Mangrove animals

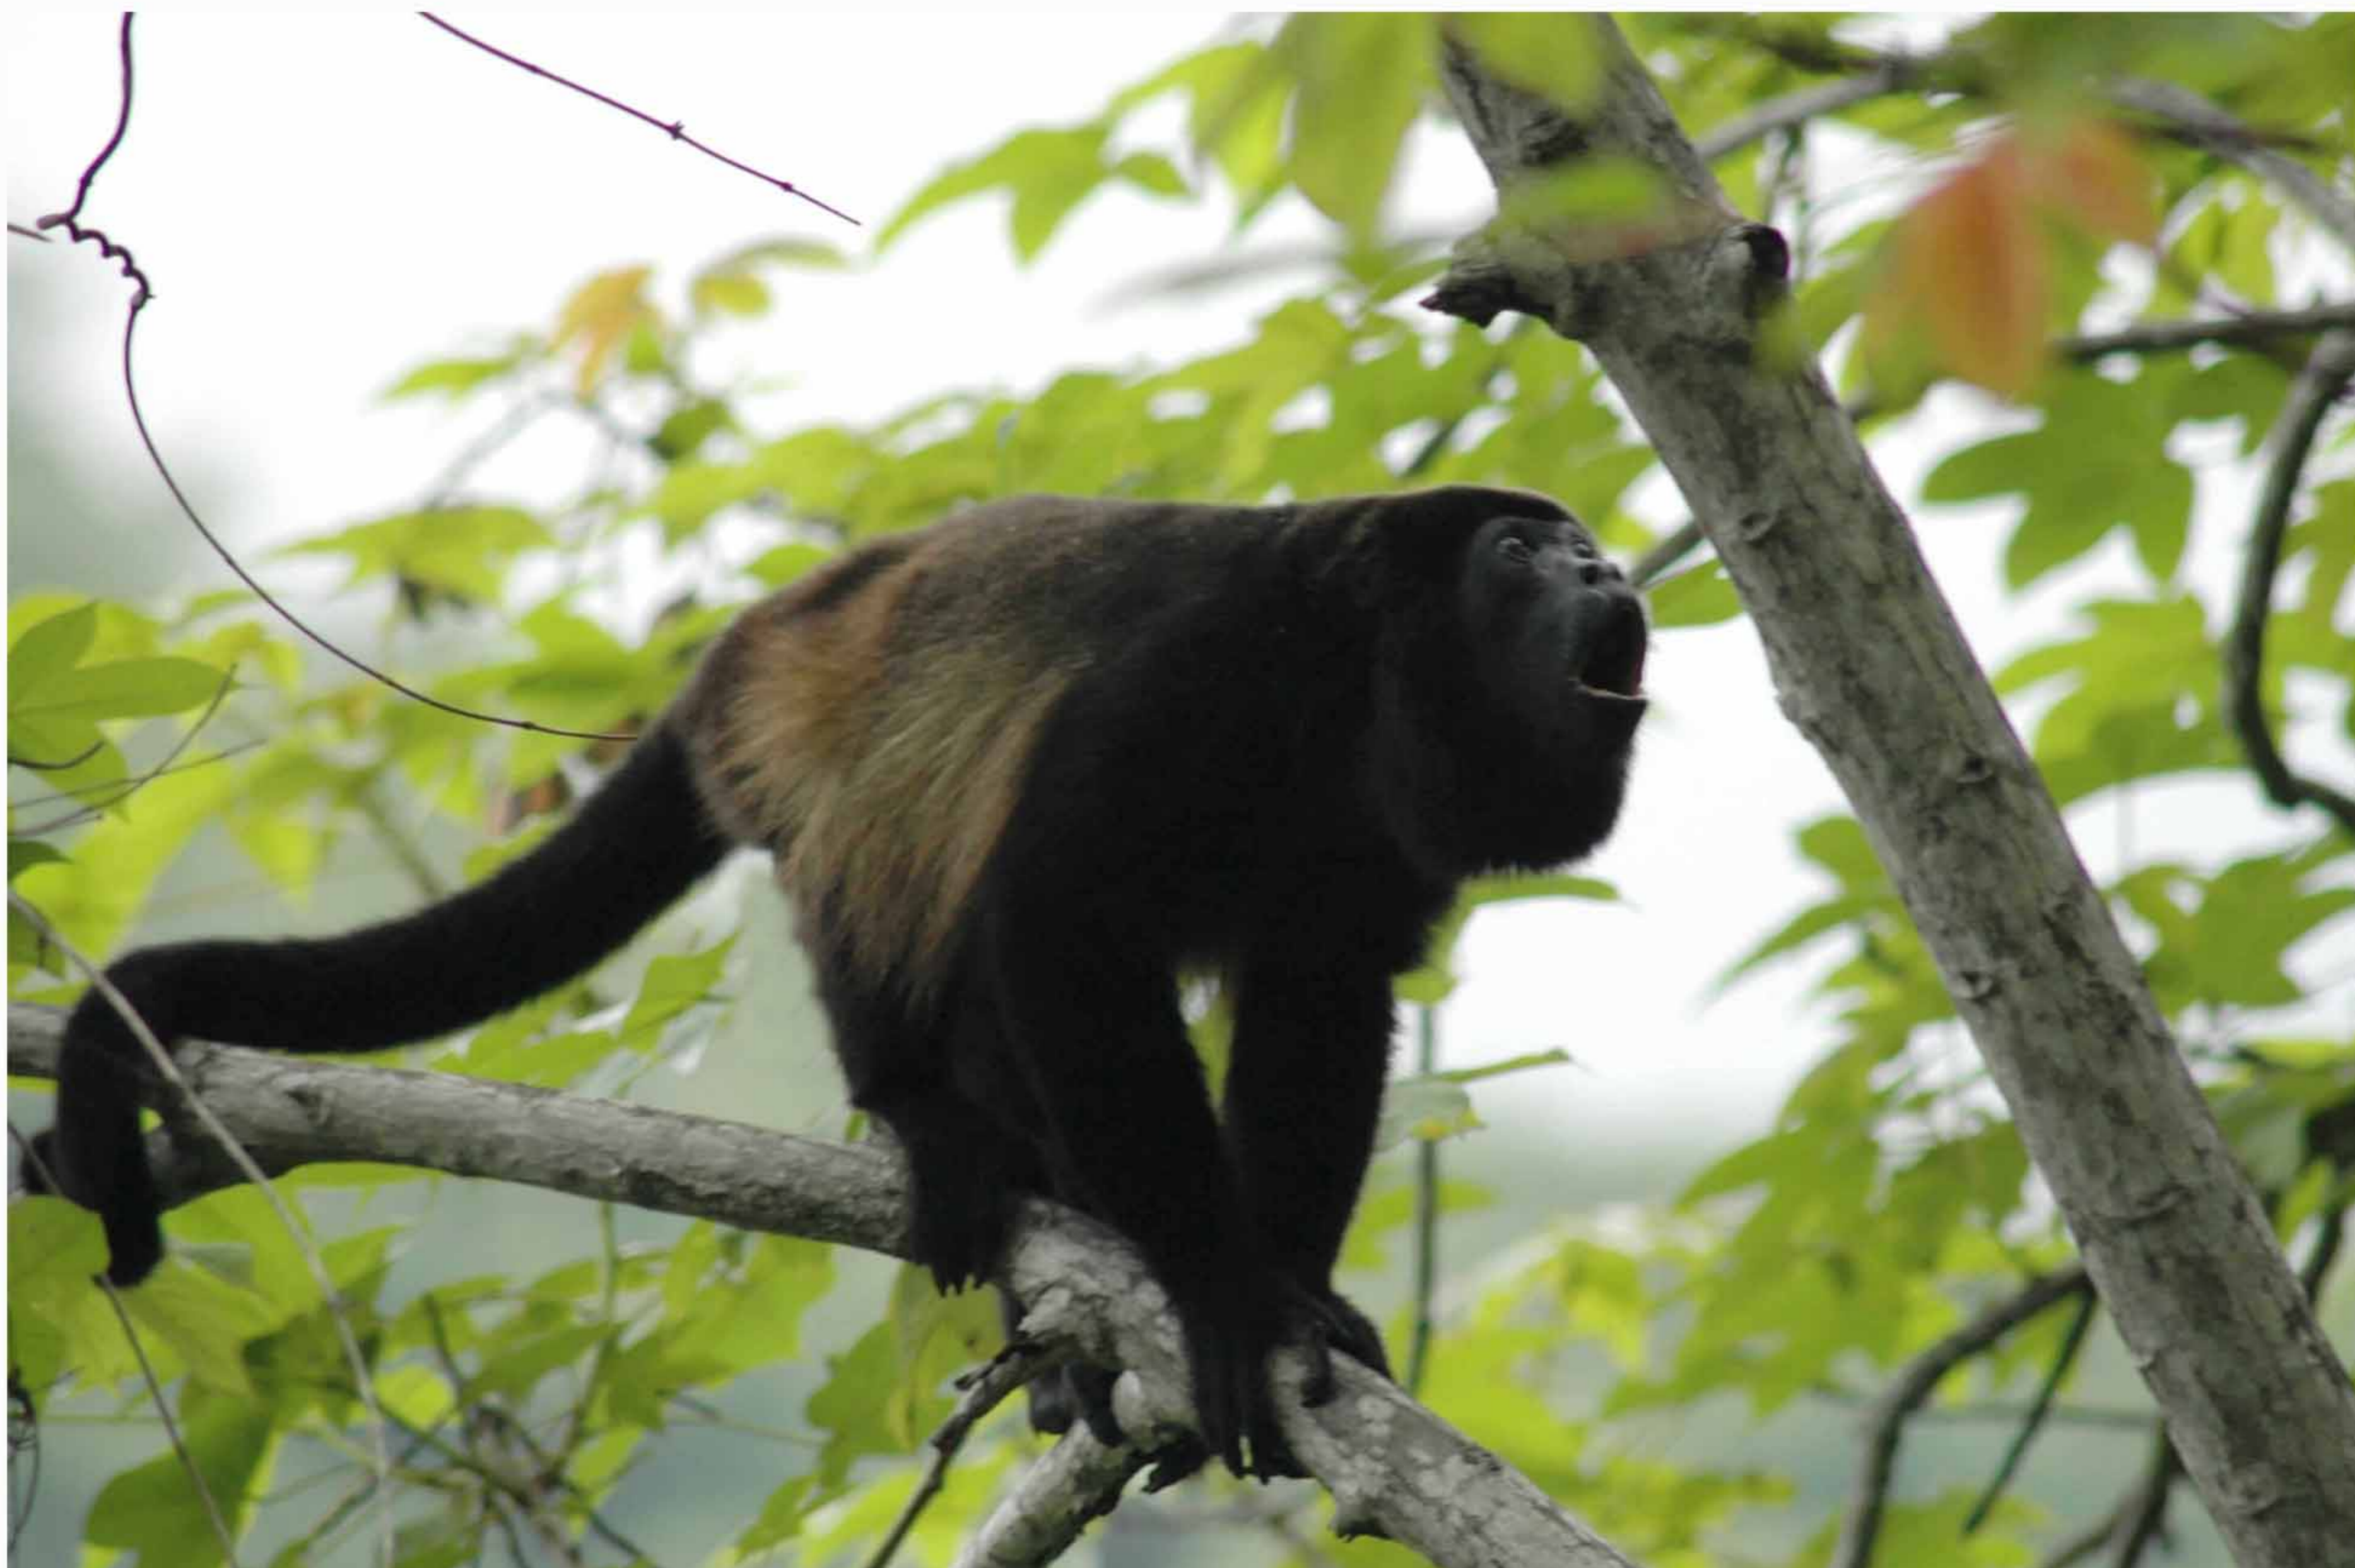

Hewan Bakau

Many creatures call the mangroves home. Birds build nests in the upper branches while molluscs grow on the roots. Snakes and crocodiles drift in and out while they are hunting and in Bangladesh even Tigers roam the mangroves. Monkeys, deer and even Kangaroos will also go into the mangroves looking for food.

Banyak hewan menyebutkan bakau adalah "rumah". Burung membangun sarang di cabang tertinggi sementara molluska tumbuh di antara akar - akar. Ular dan buaya keluyuran keluar masuk ketika berburu. Bahkan singa di Bangladesh menjelajahi bakau. Monyet, rusa bahkan kangguru juga pergi ke bakau untuk mencari makan.
